

Attention Breeders and Seed Growers!

If your operation is dependent on producing quality seeds with increased viability... you really need to consider utilizing BudBusterPro in your programs!

The programs for either seed or bud production are very similar and very cost effective. There's an option for purchasing a 4oz. pack for \$45 Priority Mail paid in all 50 states! That 4oz. pack is 118ml, the highest dilution you will use is 3ml/8 oz water!

If you're selling your seeds, you're in a very competitive market. Your customers know what exceptional seeds look like...

Good Luck in all your grows, both now and in the future!

HOW TO: When growing for seed we are not interested in trichome production, but rather lots of large viable seeds! Simply follow the Brief Program Outline for photos or autos...however, instead of ending your program with the 2ml/8 oz application 14 days post flip...just continue those 2ml/8 oz applications on a 7 day schedule right through maturity!!
